

# Campus Crime and Security Report: 2004 and 2005 Calendar Years (January 1, 2004 – December 31, 2005)

Data Gathered to Comply with Campus Security Act of 1990 and Subsequent Related Regulations

Under this Act, institutions of higher education are required to provide timely warnings to members of the campus community on certain categories of crime. Only crimes that are reported to law enforcement officials and that law enforcement officials deem occurred with same degree of certainty they would require under the FBI's Uniform Crime Reporting System are to be counted in the statistics (*Federal Register, Vol. 59, No. 82, Friday, April 29, 1994*). The initial regulations were further refined by the federal government in 1998.

Data reported is organized according to the new, more detailed classification system required by the federal government since 1998. Earlier crime statistics were reported at MPCC by way of a less complex format that involved only crimes on campus or reasonably contiguous to campus locations.

The **requirement** that institutions report statistics for referrals for campus disciplinary action for alcohol, drug and weapons possession refers to violations of law only. For example, if a student of legal drinking age in the State in which an institution is located, violates the institution's dry campus policy and is referred for campus disciplinary action, that statistic would not have been included in the institution's crime statistics, however, in this particular report, we chose to provide information on incidences where disciplinary action was taken. We believe that college officials are capable of determining whether a particular alcohol, drug, or weapons violation is a violation of law.
