

Distance Learning Courses
Held at Chase County School

INFO 1450 MC B1 JavaScript

Tuesday and Thursday, 1/11-5/6, 12:00-1:15 pm, 3 credit hours

Catalog Description: JavaScript is an easy-to-use programming language that can be embedded in the header of web pages. It can enhance the dynamics and interactive features of a page by allowing users to perform calculations, check forms, write interactive games, and special effects, customize graphics selections, create security passwords and more. This course will present the fundamentals of JavaScript. Students will learn how to write functions, use data from text boxes, create IF-THEN conditionals, program loops, and generally make their web page “smarter.”
